- Overview of routers and cutters
- Use of the router in conjunction with a side fence / Class exercises
- Use of the router in conjunction with bearing-guided cutters / Class exercises
- Use of the router in conjunction with an external fence / Class exercises
- Use of the router in conjunction with guide bushes / Class exercises
- Introduction of project (plaque)
- Laying out of project
- Making of project

Group tuition: One-Day Advanced Routing course

The One-Day Advanced Routing course follows a pattern similar to the basic Routing courses, but are more in-depth.

Within reason, the course content can be tailored to the needs and interest of the student group.

The particulars will be discussed with the students at the beginning of the day.

One-to-One tuition

One-to-One Routing tuition follows a pattern similar to the basic/advanced Routing courses in terms of covering essentials such as Health & Safety, but is tailored to the needs and interest of the individual student.

The student will have an opportunity to discuss particulars to be covered by the course with the tutor some time before the course date.
